

ROYAL RESIN CAPSULE

Description: Royal Resin capsule is a ready to use specially selected polyester resin and catalyst component in a single pack capsule form. It is inserted into the anchor hole and rotated with the bolt rotating. The catalyzed resin spreading around the anchor bolt and grout the annular space, chemical reaction between two material and giving high strength.

Application: Drill the hole up to designed depth and diameter or per specification. Dust free hole is a must by compressed air or water. Insert the Royal resin capsule which is correct that has been specified for the job. The hole with bolt or a rod, insert bolt and rotate with the drill whilst pushing progressively through the cartridge 2-3 second 150 to 300 rpm avoid high speed.

Technical Data:

Appearance	-	Cartridge
Setting time	-	2 to 5 minute
Self Life	-	3 month
Storage	-	Under shade and protect from moisture.

IMPORTANT

The product are manufactured under stringent quality standard specification and guaranteed against any manufacturing defect based our practical experience and exposure, and are believed to be most appropriate and correct. But no liability can be accepted by us as the condition of use of such products are beyond our control. The user is expected to check, the suitability of particular product for his intended uses.
